

Most often, issues with set up are with image detection, this will mostly be centered around that as a image calibration guide for images, otherwise, DM Escuminac#1856

Each image can be found in the directory byfron td\settings\images

Image Calibration

WavesNumber:

Each wave is labeled as waveNumber, ex wave29

Take a screenshot of the wave number in the menu, like this:

Wavesend:

A picture of the red button at the top of the screen, during a wave

Waves:

A picture of the waves button in the menu, that shows the waves to select when clicked on

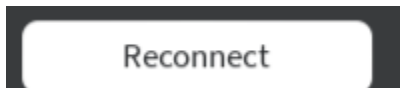

Connected:

An image of the plus symbol, next to your amount of crackers in the bottom left portion of the screen

Discon:

When disconnected or kicked from an experience, take a screenshot of the reconnect option that appears in the middle of the screen

Teambutton:

A picture of the team join button in the menu, that shows the available teams when clicked on

SavesMenuButton:

A picture of the saves button in the menu, that shows your saves when clicked on

Open:

The image of the 125 cracker price button, when buying a carbon fiber crate

**Loadsave:**

The "load" button when on the saves menu

**Jointeam:**

The option to join a team when on the teams menu

**Crate:**

The image of the lunchbox menu button, displaying the available lunchboxes when clicked on

Erroryes and errorok are optional to retake, but not necessary
